

I listen to a regional and national radio station called K-LOVE. Although it is broadcast throughout the nation, K-LOVE does serve individuals in the local community. It would be a shame to lose such a great station, just because it is broadcast all over the country. It must be extremely good to spread out through the country like it has. I want the best station, even if hundreds of thousands of other people get to listen to it also.

Please allow K-LOVE to be broadcast throughout the country. They have started small and have grown because they are a great station. That is the American way isn't it? Don't punish them for their hard work to become what they are now.
